

CHAD DUTCHER

Workstation & Infrastructure Technician | Healthcare IT (Epic / NextGen) | Multi-Site Facility Deployments
Fresno, CA | 559-649-8355 | chad.obsidiancloud@gmail.com | linkedin.com/in/chad-dutcher-1a280892/

PROFESSIONAL SUMMARY

Senior-level workstation and infrastructure technician with 8+ years of hands-on experience in healthcare IT environments. Delivered Tier 3 end-user support for 1,500+ users across 30+ clinical sites, specializing in hardware lifecycle management, EHR system support (Epic, NextGen, eClinicalWorks), and multi-site facility build-outs. Led end-to-end IT deployments for major clinical expansion projects including structured cabling, vendor coordination, hardware procurement, and clinical staff relocation. Experienced in Active Directory administration, network infrastructure, and cross-departmental change management. U.S. Air Force veteran (Security Forces) with Secret clearance (inactive, eligible for reinstatement).

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Windows Server, Linux (Ubuntu)

Healthcare IT: Epic EHR, NextGen EHR, eClinicalWorks, Imprivata OneSign (SSO), HIPAA-compliant environments

Infrastructure & Networking: Active Directory, Group Policy, O365 Administration, Microsoft Exchange/EWS, SCCM/Intune, DNS/DHCP, VPN, network switch configuration/audits, structured cabling (Cat5e/Cat6), low-voltage conduit planning, data drop placement

Hardware: Workstation imaging & deployment, multi-monitor diagnostic setups, Janus/Uniguest enterprise digital signage, Ricoh MFP/scanner configuration, Hikvision NVR/surveillance, network printers, clinical peripherals

Tools & Ticketing: Giva ITSM, Dialogflow CX, Tailscale, VS Code, Git, Python, Bash scripting

Cloud (Lab / Self-Study): Google Cloud Platform, Terraform, Docker, Firebase (GCP ACE exam scheduled April 2026, 60+ hands-on labs)

PROFESSIONAL EXPERIENCE

IT Specialist – Tier 3 / Workstation Tech 3 Oct 2019 – Mar 2026

Santé Health System, Inc. | Fresno, CA (30+ clinical sites)

Initially contracted through Robert Half (Oct 2019 – Mar 2020); converted to full-time based on performance.

Core Responsibilities

- Provided expert-level Tier 3 workstation and infrastructure support for 1,500+ end-users across 30+ clinical sites, including Heart Group of Fresno, NAMG, and CVCRSA
- Supported and maintained Epic and NextGen EHR systems, ensuring clinician workflow continuity and resolving application-level issues in production clinical environments
- Managed full hardware lifecycle: imaging, procurement, deployment, break/fix, inventory tracking, and decommissioning across clinical and administrative sites
- Administered Active Directory, Group Policy, and O365 licensing for multi-site user base; conducted licensing inventory and compliance audits
- Managed high-volume ticket queues in Giva ITSM, handling complex hardware troubleshooting, software escalations, and endpoint inventory assessments
- Served as primary vendor liaison for hardware repairs, network cabling, and data line coordination with external contractors including Valley Telecom, Christensen, PNA, and Superior Design
- Served as escalation point for Tier 1 help desk team of four, mentoring junior staff on troubleshooting methodology and ticket documentation standards
- Supported Imprivata OneSign SSO deployments; reviewed batch deployment scripts and identified syntax bugs prior to production rollout

Facility Expansion & Build-Out Projects

CVCRSA Facility Expansion & Remodel (Completed August 2025)

- Directed end-to-end IT build-out for a major clinical facility expansion from initial gut/demolition through completion, meeting a strict August 2025 deadline
- Collaborated with project planner during pre-construction phase to ensure low-voltage conduit placement was correctly specified for Cat cable runs before walls were closed
- Managed full-scale physical deployment of new computer hardware and architected the underlying network infrastructure for the expanded space
- Coordinated complex logistics, timelines, and physical wiring requirements with multiple enterprise contractors: Christensen, PNA, Valley Telecom, and Superior Design

THG Suite 106 Clinical Expansion

- Orchestrated complete technical furnishing for a newly constructed clinical suite, including hardware procurement, multi-monitor diagnostic workstations, high-capacity MFPs, and network wiring
- Managed technical relocation of specialized clinical staff (CVDX team and sonographers), ensuring minimal downtime for critical diagnostic equipment
- Navigated scope changes as suite purpose shifted from CT room to ultrasound room, adapting hardware plans and infrastructure accordingly
- Coordinated directly with client-side vendors (not just Santé vendors), managing cross-organizational communication to keep deployment on schedule
- Navigated cross-departmental change management challenges, maintaining alignment between IT delivery timelines and clinical operational needs

Enterprise Systems & Additional Initiatives

Enterprise Digital Signage (Janus Displays / Uniguest)

- Led enterprise-wide upgrade of Janus Vizia digital signage software, migrating system infrastructure from legacy versions (v3.2.0 / v4.3.2) to Version 5 across the organization
- Configured and managed the ExchangeEWS service integration, enabling real-time calendar event display on corporate signage by connecting the signage network to Microsoft Outlook/Exchange
- Diagnosed critical data-sync failure where calendar events were not reaching new displays; isolated root cause to high storage utilization tied to a known bug in the v4.3.2 server software
- Troubleshoot backend data flow by tracking and validating events.dta files generated by the ExchangeEWS service, restoring accurate live scheduling data across all localized signage
- AI Telephony Automation: Developed phased AI call-routing solution using Dialogflow CX targeting claims and customer help departments at Santé HQ
- Internal Tooling: Built Chrome extension (Giva CC Autofill v1.6) to streamline ticketing workflows, reducing average ticket creation time for the IT team
- Executed complex workstation rollouts requiring network switch audits and planned network configuration for specialized shared equipment, including Ricoh scanners for Medical Records

IT Support Specialist – EHR Jan 2018 – May 2019

Kings Medical Group (KMG) | Hanford, CA

- Provided technical support for eClinicalWorks EHR platform across clinical sites, troubleshooting application issues and workflow disruptions
- Managed hardware and software installation, repair, and maintenance for medical office workstations and peripherals
- Delivered onsite and remote support, coordinating with clinical staff to minimize downtime during patient care hours

Security Forces – A1C Sep 2007 – Jan 2009

United States Air Force | San Antonio, TX

- Held Secret security clearance (inactive, eligible for reinstatement); performed base security, access control, and law enforcement operations
- Demonstrated leadership, discipline, and ability to operate effectively under high-pressure, mission-critical conditions

ADDITIONAL TECHNICAL DEVELOPMENT

Actively pursuing GCP Associate Cloud Engineer certification (exam April 2026) with 60+ hands-on labs completed. Personal lab environment includes Terraform-provisioned GCP infrastructure, Firebase/React web application development, and a local AI inference pipeline on Linux. Experienced with Python scripting, Docker, and Git for automation and tooling.

CERTIFICATIONS & EDUCATION

GCP Associate Cloud Engineer – Exam scheduled June 2026

PROFESSIONAL REFERENCES

Client references from healthcare organizations directly supported during tenure at Santé Health System.

Sandi Alama – Chief Financial Officer, Heart Group of Fresno

559-974-4801

Relationship: Led IT coordination for THG Suite 106 clinical expansion, including vendor management, hardware procurement, and deployment.

Angela Perez – Manager, Central Valley Colon & Rectal Surgical Associates (CVCRSA)

714-696-2320 | angelafierro06@yahoo.com

Relationship: Directed the CVCRSA facility expansion and remodel IT build-out, including construction-phase wiring coordination and full hardware deployment.

Julie Gutierrez – Practices Management, Santé Health System

559-696-7874 | Jgutierrez@santehealth.net

Relationship: Santé Health System colleague; connected through CVCRSA client relationship.

Nancy Tapai – Manager, Neurosurgical Associates Medical Group (NAMG)

559-960-6509 | nmr91083@hotmail.com

Relationship: Primary IT support contact for NAMG site, handling all technical issues and infrastructure needs.

COLLEAGUE REFERENCE

Jose Gomez – Tier 2 IT Technician, Santé Health System, Inc.

559-718-4110 | Gomezjose188@gmail.com

Relationship: Direct colleague and co-escalation partner; collaborated on complex troubleshooting and infrastructure issues across clinical sites.
